

spirit of the time ■

Time shapes each era with different styles, values, and sense of aesthetics. A popular approach in yesterday's world is today replaced by new trends and designs. The Spirit of Time penetrates our lives with continuous change.

spirit of the time 

Coante is a young and vigorous brand transforming the sector with innovations

Long-vein-quartz products developed by Coante brought about a huge transformation in the sector bringing in natural spontaneity into living spaces and keeping a distinct contrast from those ordinary products accustomed in the market.

Coante is a customer-oriented brand.

Coante works for ultimate customer-satisfaction, and it offers highest quality products covered under longer periods of product guarantee.

Coante is a confident brand.

Coante praises its success as only a few steps taken for growth on a global scale and heads for market competition on a global basis.

Coante is a brand living the Spirit of the Time.

The pros of being a young and vigorous brand is having to start breathing with the Spirit of Our Times. That is the reason why Coante is an environment-friendly, customer-oriented, innovative and all the while a jolly and ever-developing brand which is born with the merits of the 21st century, using technology in an ever-progressive way.

Coante is a brand that unifies the precision of past with the courage of youth, devotedly working to adorn future.

Today and Always...

Coante

spirit of the time

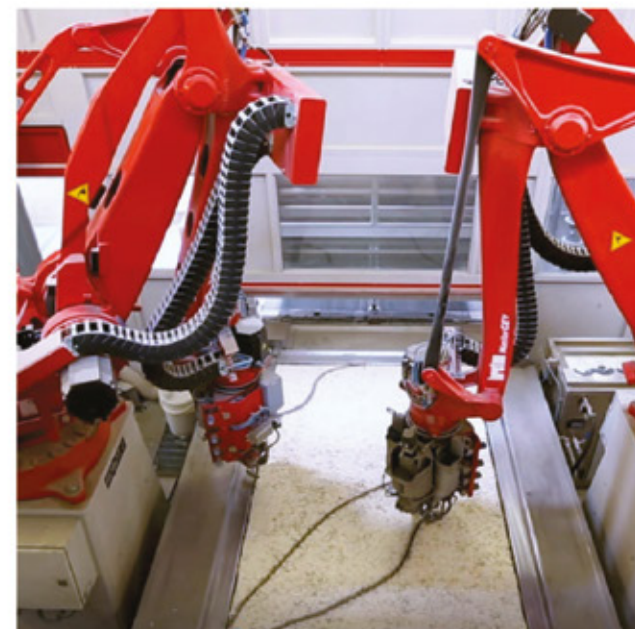

The nature, our homes and beloved ones dominate our priorities in life more than ever now.

We're living in a world of values where ease of use, food safety & hygiene, and aesthetics are on the rise and shaping the Spirit of Time. Coante is rising on the grounds of these values...

Because Coante is the Spirit of Time.

spirit of the time 

**Creating distinct
difference
with unique
innovations!**

Both Research & Development and Product Development constitute significant place in Coante's operations.

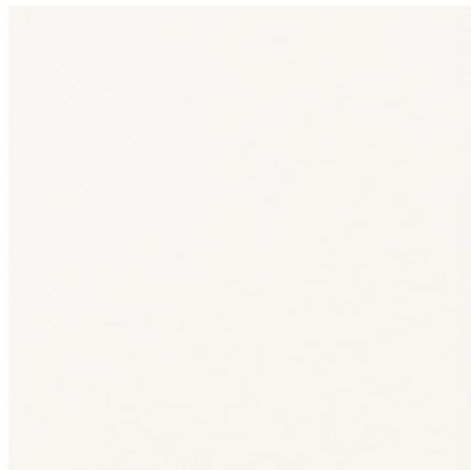

R&D activities show a continuous progress orienting towards product development as well as manufacturing process development and total quality improvement.

P&D activities in Coante are multidisciplinary. Ideas refined from spiritedly developing trends in the world of design and everchanging lifestyles are reflected to Coante's colours, surface applications, design, and collections. The goal of Coante is always to design in today the products of tomorrow which are capable of leading the design world of the future.

Superior Coante Reliability

Coante Countertops include natural quartz minerals up to 93%. Quartz is one of the hardest minerals in nature and such high amount of quartz content in Coante countertops make them highly resistant against scratch and impact.

Nonporous structure of Coante countertops do not allow for bacterial, fungal or mould formation and growth, therefore they are hygienic and give you the opportunity to gather all your loved ones around healthy tables.

Coante countertops are non-absorbent which make them stain resistant and easy to care and maintain.

Coante countertops are not chemically pre-treated to form a protective layer on the surface. Unlike natural stone countertops, Coante countertops do not require any chemical treatment to get them non-liquid-absorbent or more lustrous on the surface.

Chemical resistance of Coante countertops is significantly high. Chemicals with 5-8.5 pH degree used as daily cleaning products and acidic food like lemon do not affect the surface of Coante countertops. Coante countertops do not have hairline fissures or structural weaknesses which are commonly seen in natural stones. They are fully homogenous with the same degree of strength at each point throughout the slabs.

Coante offers aesthetic solutions for both modern and classical decorations. Jumbo size slabs make it possible for maximised use with minimum seaming.

BOOK
MATCH

DESIGN & SURFACES

When it comes to Coante, your options are not limited merely to colour and pattern.

When you design a modern living area, your preference of surfaces not only creates an artistic value in term of aesthetics, but also affects the ambiance of the area as a whole.

Polished surfaces reflect light, and while providing a sense of depth to your living areas, make them spacious as well. Whereas Touch surfaces give a sense of different touch and unequalled elegance while building a modern identity in your living areas.

POLISHED SURFACES

Polished surfaces bring in a unique shine in areas of use via their reflective nature.

BOOK MATCH

Bookmatching is matching two or more long-veined Coante products together so as to look like an opened-book where the adjoining slabs mirror one-an-other with an identical pattern. You can prefer the power of symmetry to create a splendid effect in your living areas.

talia grey 7706

TOUCH SURFACES

Touch surfaces are less reflective in nature and silky in touch, producing both a visual and a tactile experience with your countertop.
